the aviation aindustry and EPA h as been doing a number on the

american public. We are being poisoned by the toxic emissions from aircraft engines, endangered by the aircraft crashes and made unhealthy from the terrible noise of aircraft taking off all night long, so one cannot get a night of sleep. But the poisoning of the air through the endless toxics that this industry uses is horrible. It is time that EPA institutes rigorous standards against this air pollution. Certainly automobiles have been attacked endlessly by EPA and aircraft have been unscathed in any attempts to regulate the endless toxics that their engines emit. It is time for rigorous standards to be instituted NOW. Before we all die from the toxicity emitted by this industry which the FAA forces on all of the people, regardless of whether they want it or not. Campaign money to politicians goes so far in america that the will of the people seems to be overridden -especially with the

wealthy aircraft industry. It is time to make people safe - make they healthy and put some true pollution controls o airplanes. Regulation of this industry has been far far too lax.
